SUMMARY

Proactive third-year Information Technology undergraduate specializing in Software Engineering, with hands-on experience in full-stack web development using Java, React, Node.js, and RESTful APIs. Built multiple real-world projects following MVC architecture, secure authentication, and database-driven design. Strong foundation in OOP, data structures, and SDLC, with a keen interest in scalable, user-focused applications. Actively seeking a Software Engineer Intern role to contribute to production-level projects, learn from experienced engineers, and grow in modern software engineering practices.

SKILLS

- **Programming Languages:** JavaScript, Python, Java, Kotlin, PHP, C, C++
- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Technologies:** Node.js, Express.js ,Java (with Spring Boot)
- **Databases:** MongoDB, MySQL
- **Mobile Development:** Android (Kotlin)
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Postman, Figma
- **Methodologies:** Agile/Scrum, OOP, MVC, SDLC, Data Structures & Algorithms

EDUCATION

Sri Lanka Institute of Information Technology **2023 - Present**
B.Sc. (Hons.) Information Technology, Specializing in Software Engineering

Mahinda College,Galle **2019 - 2021**
Advance level - Physical Science

PROJECTS

MEARN stack project - Furniture.lk

- Developed a full-stack service provider job marketplace. Built RESTful APIs with Node.js and Express, designed MongoDB schemas with Mongoose, and created responsive React interfaces. Enabled real-time job visibility and smooth frontend–backend integration.

Flight booking system - Airvoyager_Air tickets

- Developed a full-stack web application using PHP, XAMPP, phpMyAdmin (MySQL) for managing air ticket reservations. Implemented complete CRUD operations with user authentication .

Online Food Delivery System - Food Order

- Web application using Java Servlets, JSP, MySQL, and MVC architecture. Implemented complete CRUD operations. Focused on modular design, secure data handling, and scalable architecture deployed on Apache Tomcat.

Android wellbeing App - Habit tracker

- Built an Android wellness application using Android Studio and Kotlin with habit tracking, mood logging, and SharedPreferences-based storage.

Inventory Management System - Elymon

- Engineered a full-stack web application for managing inventory with Spring Boot and React. Designed MySQL database schemas and implemented RESTful APIs with secure CRUD operations and stock management functionality.

ACHIEVEMENTS & ACTIVITIES

- **Served as a Senior Prefect Board Member at school (2017–2018)**, contributing to student leadership, discipline, and event coordination.

CERTIFICATIONS & COURSES

- AI/ML Engineer – Stage 1, Sri Lanka Institute of Information Technology (SLIIT).
- Java Intermediate Certification, Sololearn.
- Intro to Docker, Le Wagon.
- Python Beginners, University of Moratuwa.
