SUMMARY

Proactive third-year Information Technology undergraduate specializing in Software Engineering, with hands-on experience in full-stack web development using Java, React, Node.js, and RESTful APIs. Built multiple real-world projects following MVC architecture, secure authentication, and database-driven design. Strong foundation in OOP, data structures, and SDLC, with a keen interest in scalable, user-focused applications. Actively seeking a Software Engineer Intern role to contribute to production-level projects, learn from experienced engineers, and grow in modern software engineering practices.

SKILLS

- **Programming Languages:** JavaScript, Python, Java, Kotlin, PHP, C, C++
- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Technologies:** Node.js, Express.js, Spring Boot, Microservices Architecture
- **Databases:** MongoDB, MySQL
- **Cloud & Deployment:** Vercel, Netlify, Docker, Kubernetes, CI/CD Fundamentals
- **Mobile Development:** Android (Kotlin)
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Postman, Figma, Docker
- **Methodologies:** Agile/Scrum, OOP, MVC, SDLC, Version Control (Git-based workflows)

EDUCATION

Sri Lanka Institute of Information Technology	2023 - Present
B.Sc. (Hons.) Information Technology, Specializing in Software Engineering	
Mahinda College, Galle	2019 - 2021
Advance level - Physical Science	

PROJECTS

Online macket place - Furniture.lk :-<https://github.com/EshanRandunu/Furniture.lk>

- Developed a full-stack service provider job marketplace. Built RESTful APIs with Node.js and Express, designed MongoDB schemas with Mongoose, and created responsive React interfaces. Enabled real-time job visibility and smooth frontend-backend integration.

Healthcare System - **Medilink**:- <https://github.com/MediLink-Microservices>

- A microservices-based healthcare platform using Spring Boot for backend services, MongoDB for data persistence, and React for the frontend. The entire system is containerized with Docker and orchestrated on Kubernetes.

Flight booking system - **Airvoyager** :-<https://github.com/EshanRandunu/Flight-booking-system>

- Developed a full-stack web application using PHP, XAMPP, phpMyAdmin (MySQL) for managing air ticket reservations. Implemented complete CRUD operations with user authentication .

EVbooking system- **EV equity mapper**:-<https://ev-equity.vercel.app>

- Developed full-stack MERN application to map EV charging stations with secure authentication, CRUD operations, and interactive maps/visualizations using React, MongoDB and deploy using Vercel.
- **link**:-<https://ev-equity.vercel.app>

Inventory Management - **Elymon** :- <https://github.com/EshanRandunu/InventoryManagementSystem>

- Engineered a full-stack web application for managing inventory with Spring Boot and React. Designed MySQL database schemas and implemented RESTful APIs with secure CRUD operations and stock management functionality.

ACHIEVEMENTS & ACTIVITIES

- **Served as a Senior Prefect Board Member at school (2017–2018)**, contributing to student leadership, discipline, and event coordination.

CERTIFICATIONS & COURSES

- AI/ML Engineer – Stage 1, Sri Lanka Institute of Information Technology (SLIIT).
- Java Intermediate Certification, Sololearn.
- Intro to Docker, Le Wagon.
- Python Beginners, University of Moratuwa.
